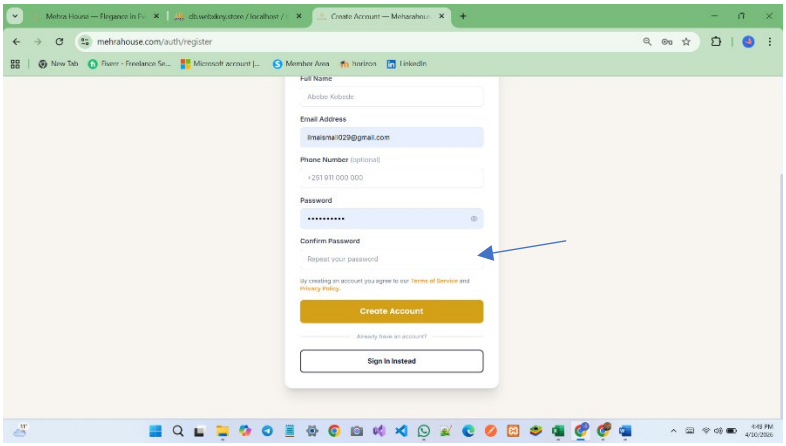
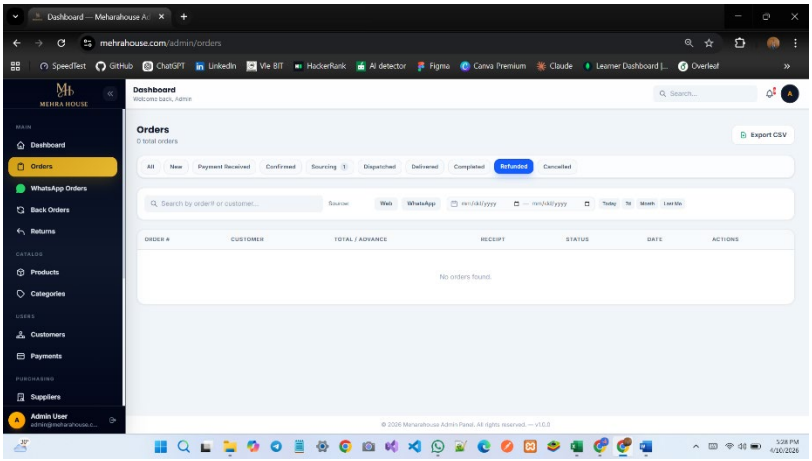
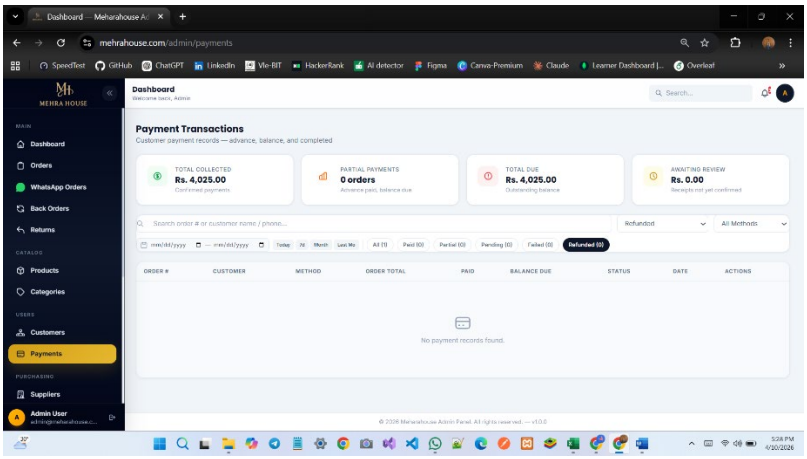
Bugs Identified – Mehrahouse.com

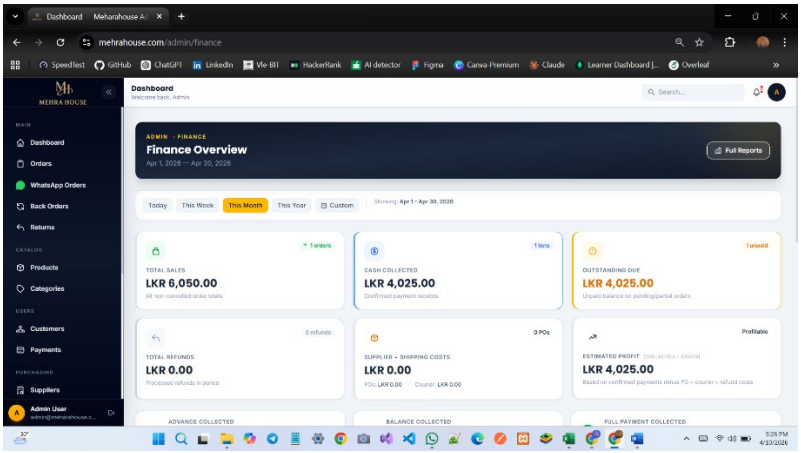
1. Sign up -> Create account -> Repeat password eye toggle button is not there
   https://mehrahouse.com/auth/register



2. Orders -> A customer made orders for 2 products, admin decides to refund the amount of one product due to the unavailability of the stock and confirmed the other product order with back order. When refunding there is no any options to collect user's account number or notifying them regarding the refunding.
   And also refunded transaction is not reflected anywhere.
   https://mehrahouse.com/admin/orders - Refunded
   https://mehrahouse.com/admin/payments - Refunded
   https://mehrahouse.com/admin/finance

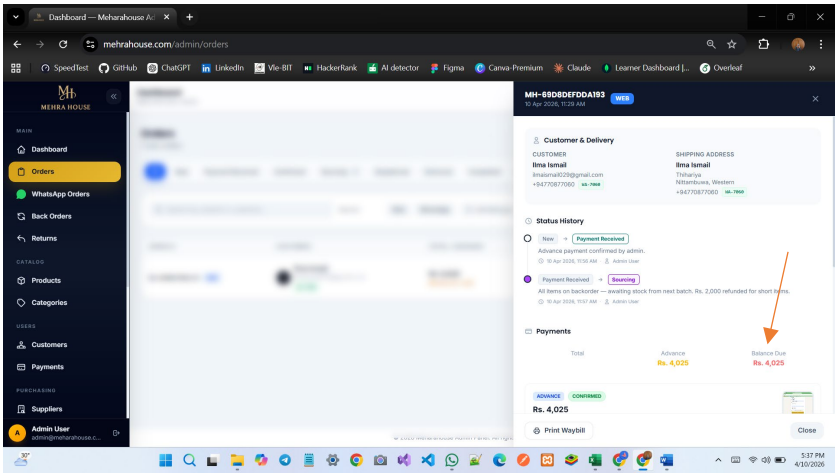




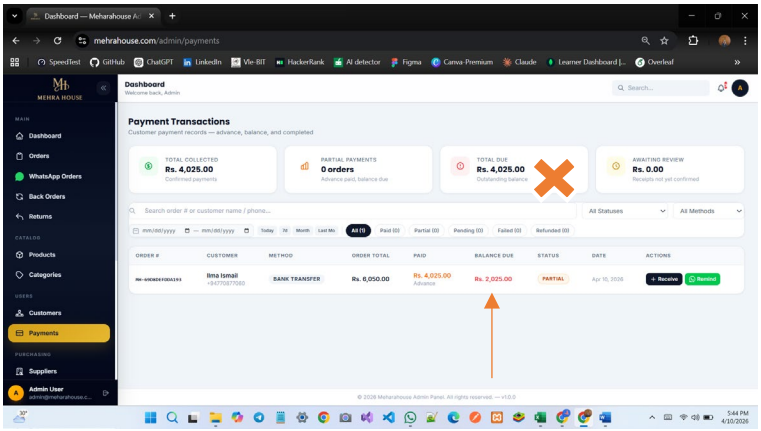


3. Orders -> Action -> View order -> Here, balance due should be only for the confirmed product. But the balance due is shown along with the refunded product+its tax value

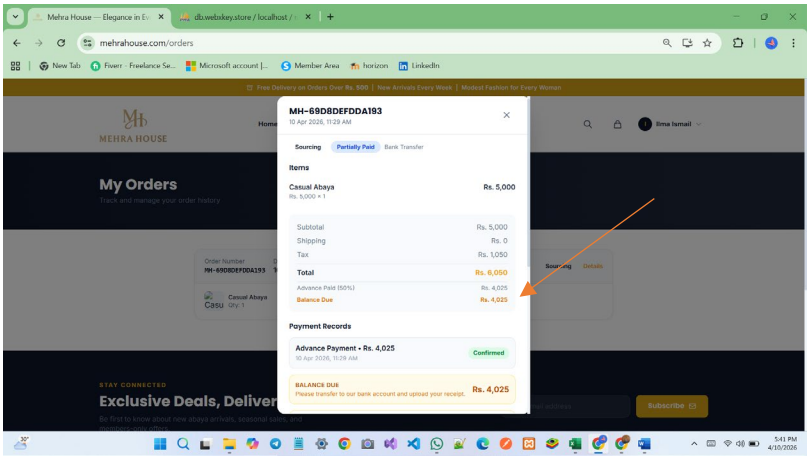
   https://mehrahouse.com/admin/orders -



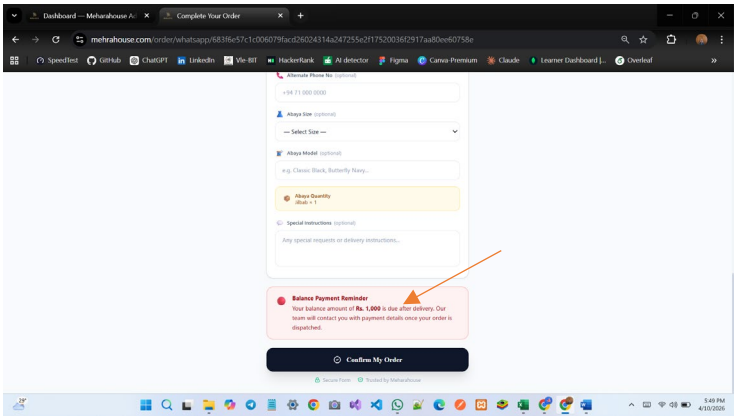
https://mehrahouse.com/admin/payments - Total due in the upper part is incorrect, but the balance due in the transaction marked by the arrow is correct.



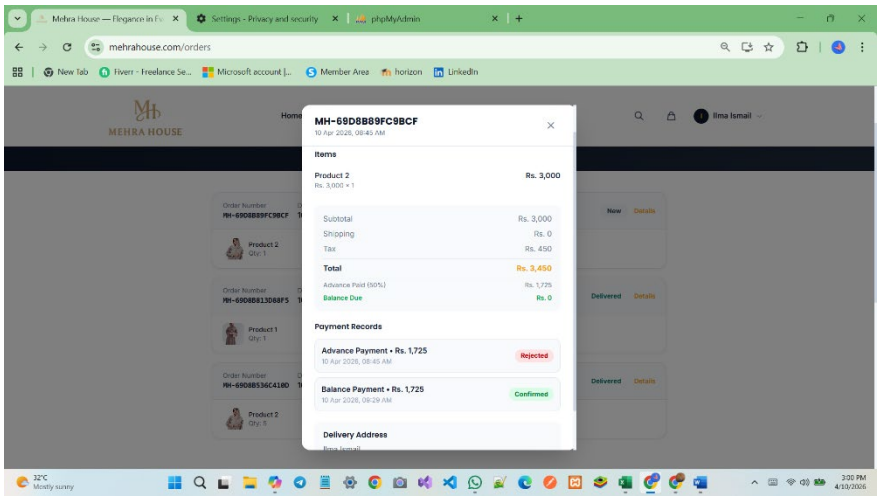
4. Customer account [username: ilmaismail029@gmail.com pw: test@12345]-> My orders -> Details -> User made orders for 2 products, one is refunded and the other is confirmed. But the balance due is shown for the refunded amount+its tax.



5. Customer makes an order via whatsapp -> When entering the details in the link, the text below should be changed into “before”

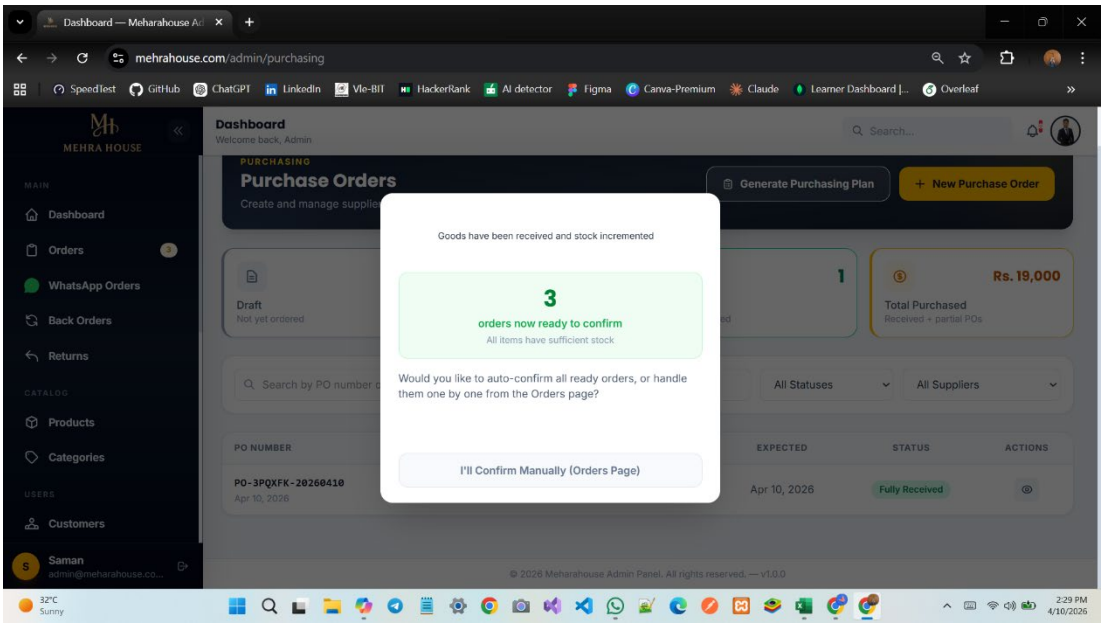


6. User account -> Profile -> My Orders -> When a payment receipt is rejected from the admin side, the customer should be able to re-upload the payment slip again to verify. But here, there's no any option to re-upload.

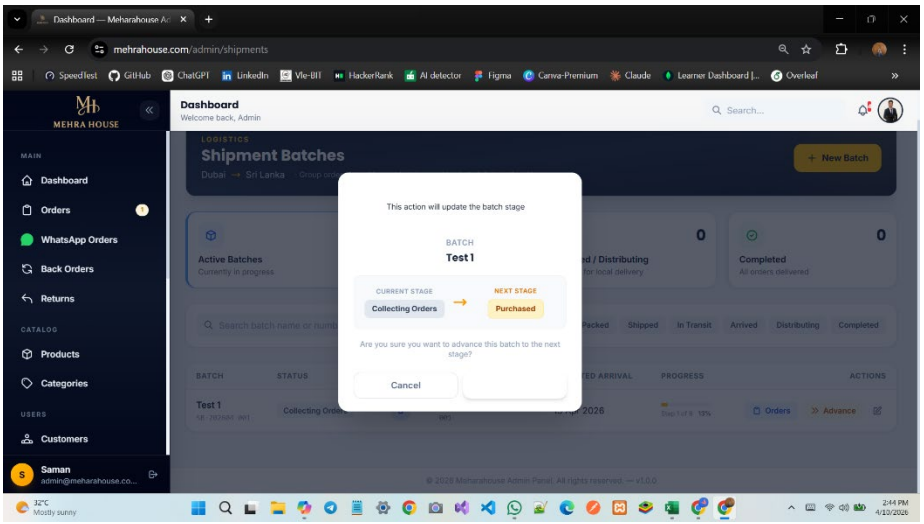


7. Replace function is not working. When a product is out of stock, the admin can replace the product, but after the replacement, the price difference and total due is not reflected anywhere. Even in the details, the product hasn't change. After replac button is pressed the text inside the button is invisible.

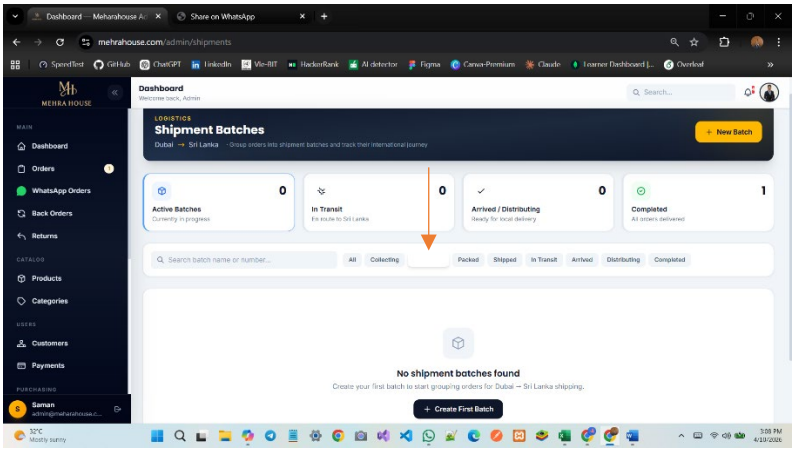
8. Purchase orders -> Receive goods -> it asks for two options(auto or manual) but only manual option button is shown



9. Shipments - >>Advance - Ok button is not visible in all stages. But ok action works

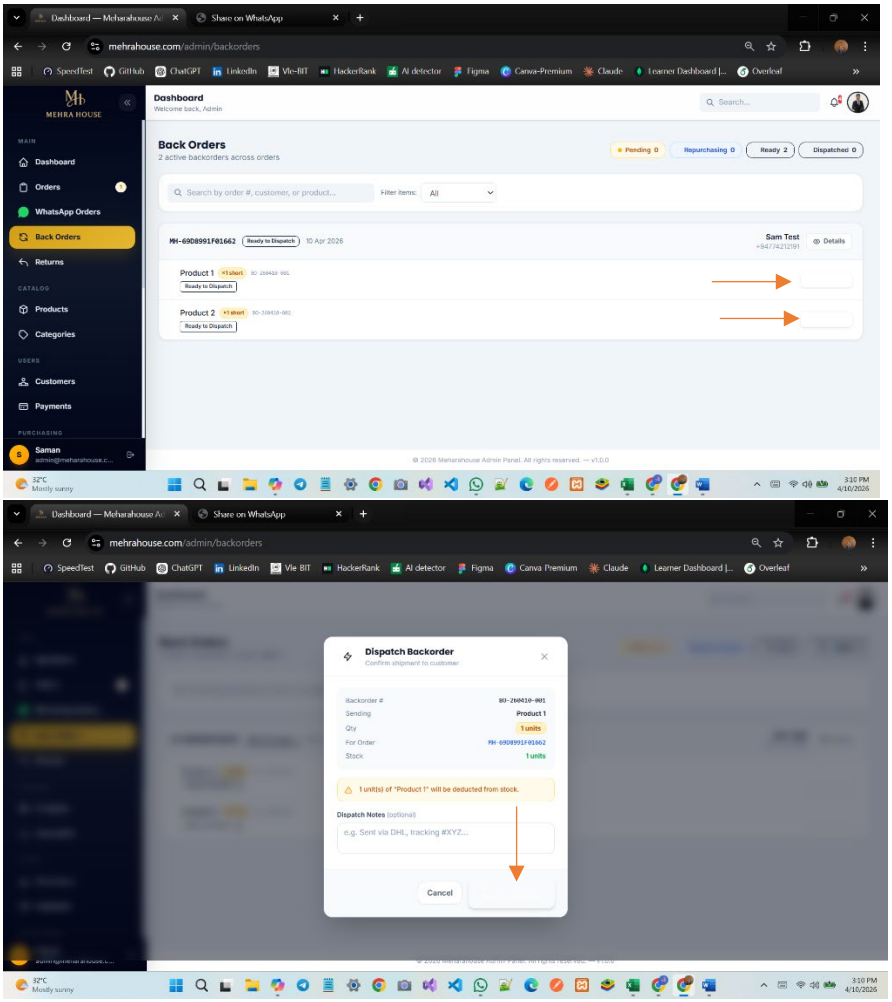


10. Shipments -> When clicking these buttons, the text inside the button disappears.

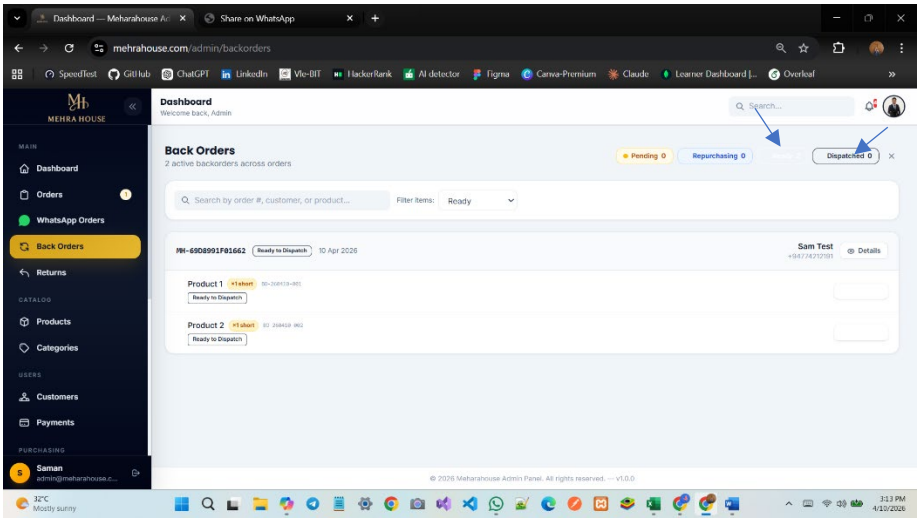


11. In the shipments, even when the customer has not paid the full payment, the system allows to deliver the product by pressing >>advance. Its better to add a warning message saying that “Product is ready to be delivered but full payment is not paid” and stop the admin before final delivery when pressing >>advance button.

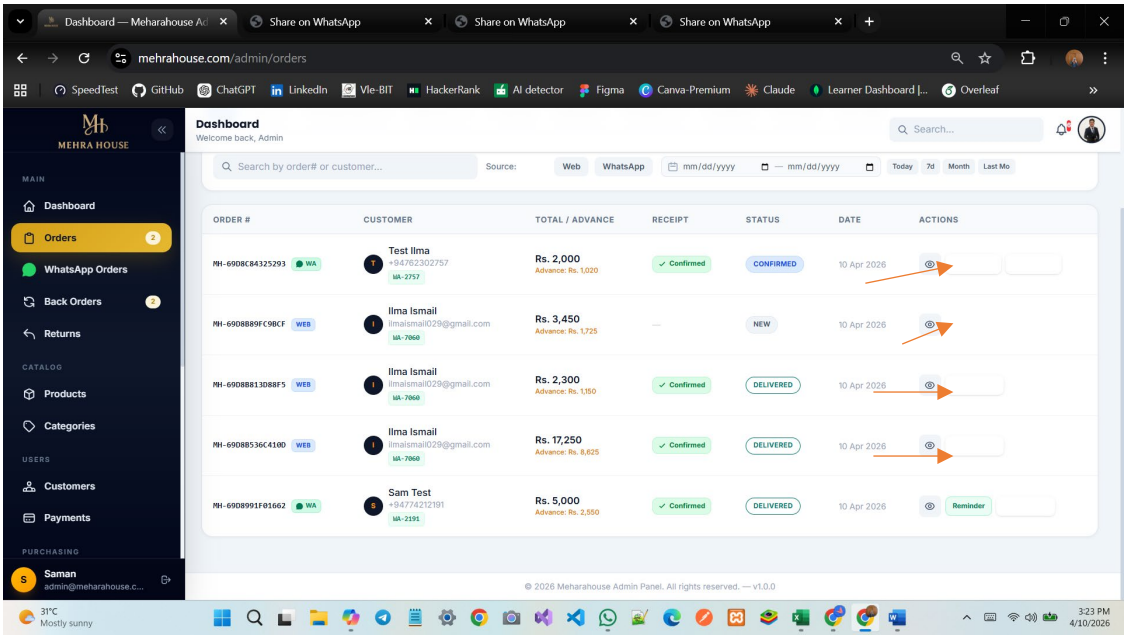
12. Back orders -> Text inside the buttons are not visible.

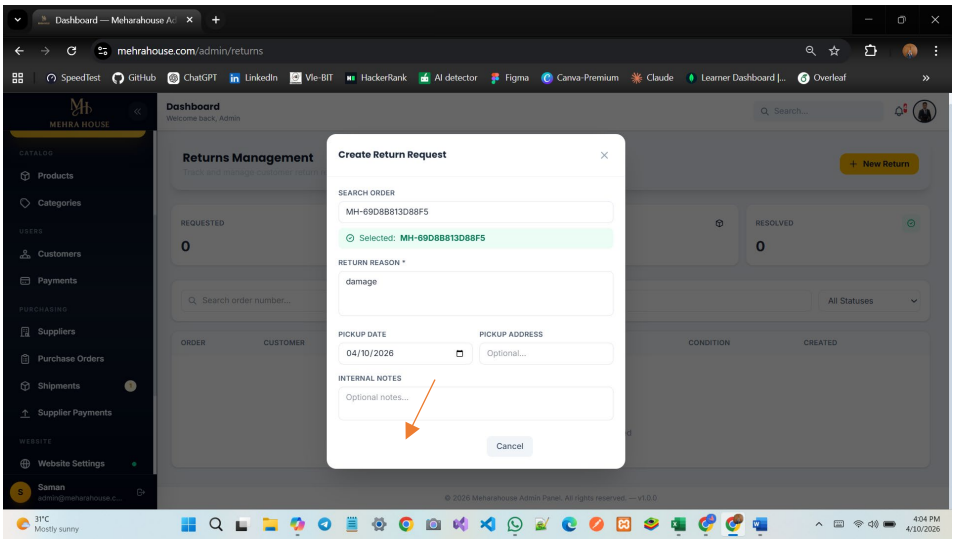


13. Back Orders -> When the buttons on top are clicked, the text becomes invisible



14. In orders -> These buttons are not visible





15. Return -> +New Return-> No button for confirmation
