Bugs Report2 – Mehrahouse.com

1. User makes an order via web with half payment -> Admin accepts the receipt, but the product is out of stock. Admin then confirms the order and Handle the stocks by adding it to purchase plan -> And now admin dispatches the order and when payment outstanding message pops up, admin clicks “Dispatch anyway” -> After that, admin clicks the “Delivered” button and “Complete” button. According to the order details, it says the product is delivered to the customer, but in truth the product is out of stock and never purchased. Here, the admin is allowed to deliver the product to the customer even before the product is restocked.
   And in the status history it is mentioned balance is paid, but the remaining balance is not paid at all.

2. Now the Admin goes to Shipments and creates a new batch to deliver, but the order made above is not showing in the “Orders”. Without any orders selected, admin clicks the “Advance” button and the delivery completed even without any orders.

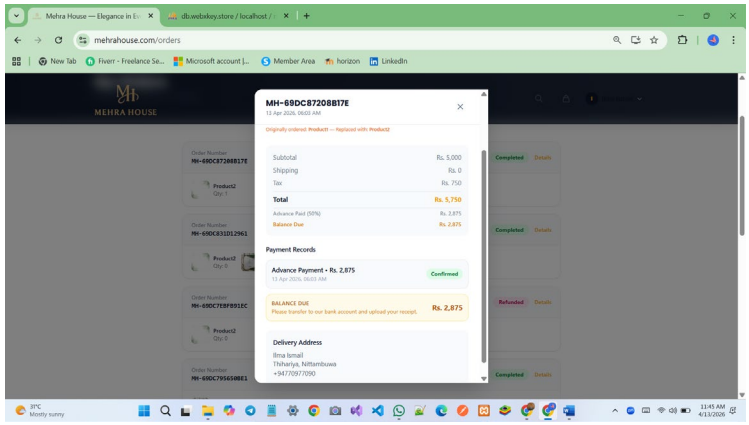
3. When the admin marks the half paid order as dispatched -> Delivered -> Completed -> Then the receipt upload option for second half payment in user's account gets closed and unable to upload the remaining payment. https://mehrahouse.com/orders



4. Payments -> Total due is not updated

6. Customer orders 2 items, 2,000 + 5,000 + tax value = 8050. Now the customer pays half payment of 4,025. Admin confirms the payment receipt. Now admin decides to refund the Product2(5000). System tells the user to refund Rs. 5000 back. But actually the user has paid only Rs.4,025. According to the prices, admin needs to refund only 940 (if considering full payment) / 2482.5(half payment). This will confuse the admin if not calculated properly. Because of this it misleads the Finance section as well.
